

Bank note production faster and more secure with end-to-end digital systems running on **SAP Business One**[®]

Before: Need for tighter control and transparency

- Designing and manufacturing bank notes for India and other countries requires strict control over security, quality and reporting
- To streamline the process and deliver full transparency, BNPM India needed a state-of-the-art enterprise resource planning (ERP) system just as sophisticated as their production machinery
- Existing IT systems lacked the required levels of control, data management and reporting

Why SAP and Ikyam Solutions

- A proven and trusted solution, SAP Business One offered an end-to-end digital business management system that met their needs, was user friendly and affordable for a tight budget
- BNPM India selected SAP Partner Ikyam Solutions due to their specialised technical competency, and proven track record of streamlining business processes using SAP Business One

After: 360° visibility at every stage of production

- An all-in-one system across all departments and consolidated and secured data company-wide
- Trackable process control and data checks at every stage in the process and by individual role
- Real-time analytics and reporting dashboards for key metrics deliver 100% transparency
- The elimination of many manual processes through automation and digitisation has improved accuracy and streamlined processes to increase efficiency

“SAP Business One implemented by Ikyam Solutions is an excellent business solution at every single point, with **strong technical functionality that has streamlined business processes.**”

Pratyush Srivastava, Assistant Manager Technical/Engineering, BNPM India

360° view

Unified platform enables a real-time view across departments and enterprise-wide.

Secure

Strict security controls ensure transparency and accountability at every step.
