

BRITA India Water gets business systems flowing smoothly with a digital makeover powered by SAP Business One®

Before: Manual processes and communications

- As a leader in water optimisation technology since 1966, BRITA set about a major transformation to build a digital backbone to maintain their growth and leadership in a competitive market
- Existing financial systems were becoming inefficient and slow
- There was a desire to streamline department operations using digital tools
- An over reliance on email due to a lack of user-friendly communication tools
- Manual reporting slowed the flow of information

Why SAP and Ikyam Solutions

- SAP Business One offered in-built financials, reporting and communications tools, delivering the affordable digital backbone BRITA needed to build a connected enterprise long term
- BRITA partnered with Ikyam Solutions as they are an SAP Silver Partner with proven results over several years using SAP Business One to help business run more efficiently

After: Digital backbone to drive long term success

- Synchronisation between departments makes collaboration and communication fast and simple
- Real-time analytics and reporting dashboards for key financial and operational metrics enable fast, informed decisions across departments
- Minimising manual and duplicated tasks has empowered the team to focus on more valuable tasks and be more disciplined in their customer focus
- Ikyam Solutions' service delivery during implementation and ongoing support have been excellent

“SAP Business One, implemented by Ikyam Solutions, as our core enterprise resource planning platform gives us **a solid backbone for all our business processes. Thanks!**”

Piush Mehra, Finance Manager, BRITA

Easy to use

User-friendly software allowed managers and staff to get up and running fast from day one.

Unified

Integrating departments, locations and business systems under one central platform.
