

Pepper farmer combines traditional farming with modern technology to grow their business with **SAP Business One**®

Before: Decentralised manual systems

- As a farmer and exporter of Indian Green Pepper since 1994 with a range of related products, Herbal Isolates decided to upgrade their business technology to maintain business performance
- Traceability is essential when delivering a food product, however existing systems required manual tracking across multiple product SKUs which was cumbersome to maintain
- Lack of a centralised database led to duplicate processes and challenges with data integrity
- No efficient way to run real-time reports on variance analysis, costing and budgeting, which made management decisions difficult

Why SAP and Ikyam Solutions

- SAP Business One offered an end-to-end business management solution covering finance, inventory, stock control, sales and reporting, which was within budget
- Having evaluated a shortlist of partners, we selected SAP Silver Partner Ikyam Solutions due to their specialisation in SAP Business One, 6-year track record and their understanding of our needs.

After: Real-time reports, tracking and control

- Customisable real-time dashboards and trend analysis tools enable fast, informed decisions and increase overall operational efficiency and profitability
- Centralised and secure databases ensure data integrity across the enterprise
- Automated alerts and customised reports at key stages of production help identify issues early
- Accurate data and integrated systems ensure accurate and timely export invoices
- Powerful inventory management tools assist production and farming planning and forecasting

“With SAP Business One implemented by Ikyam Solutions, **our confidence has improved in our business processes!**”

Vinu Mathew K – Finance Manager, Herbal Isolates

Automated

A shift from manual to automatic processes enables faster delivery at a more consistent quality.

Centralised

All customer and product data housed in one location for easy reporting and communication.
