Solving management challenges and adhering to real-time Integration engine with SAP Business One®

Before: Business challenges
- Multiple item master and vendor master errors and duplications
- No robust accounting process
- Unable to have control on transactions which were tough to streamline
- High risk of editing and deletion of transactions
- Lack of control and visibility over purchases, goods receipts and payments

Why SAP and WBC Software
Wiaan Business Corporation is a SAP Open Ecosystem Service partner who recommended the solution to overcome business challenges:
- Streamlining the entire purchase process such as material requirements and planning
- Unique code concept to avoid master duplicate
- Providing support for proper accounting flow for all the transactions and control
- WBC built a two way real-time Integration engine with SAP Business One and agile hospital management system for purchases, sales, goods receipts, inventory and payments

After: Results driven value
- Able to streamline the masters and process at Procurement and Accounting
- Proper accounting flow and user control
- Monitoring and controlling the activities using automated reports in real-time

80%
User control and streamlining the process across all the functions

90%
WBC support on business requirements
